# Kipling Strategic Income Fund

as at August 31, 2020

#### **Key Benefits**

Provides **a steady income stream** through fixed income investing.

Capital preservation while **mitigating risk exposure** from both an interest rate risk and credit risk perspective.

**Diversified portfolio** of bonds by sector, issuer and maturity.

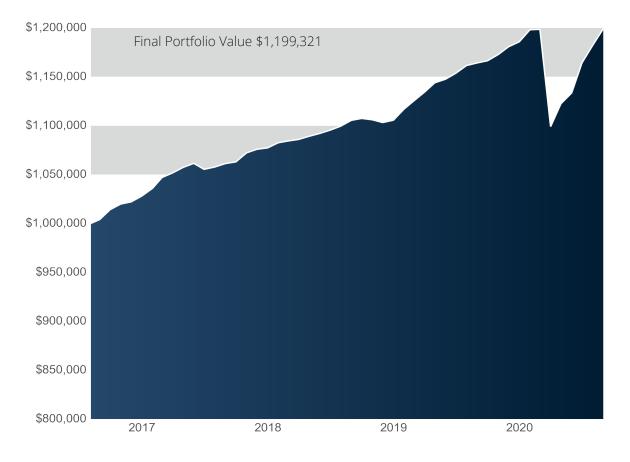

Canadian corporate bond new issuance totalled about \$7.2 billion for the month of August, 16% more issuance than August 2019. The Bank of Canada did not buy any corporate bonds during the month of August as the new issuances were well oversubscribed as investors were searching for yield. The yield curve steepened though, with rates moving higher as much as 25bps in the long end. Corporate spreads tightened in as much as 19bps, with BBB short end product performing the best. The bond universe returned -113bps while the corporate bond index returned -51bps, while the short bond index returned 9bps. Canadian High Yield returned 205bps. The Fund performed well from Precision Drilling 21s, MCAP Commercial LP, Superior Plus, First National and our shorts on Government of Canada bonds.

2. Partial Year

1. Annualized return. 2. 2016 Return begins at Fund inception. 3. Portfolio Metrics are sourced from CapitalIQ. 4. Portfolio Statistics are calculated on Series M since inception. 5. Benchmark: 50% FTSE Canada Universe Bond Index/50% FTSE Canada IG Corporate 1-5Y Index (100% Long). The benchmark represents the primary investment universe of the Fund, but may have a longer duration relative to the Fund's bond allocation which has a short duration bias. The Fund may also invest, to a lesser extent, in money market bonds or equivalents, high yield bonds, convertible bonds and preferred shares which are not represented in the benchmark. 6. Risk level is determined using the Fund's ten-year standard deviation. If a Fund does not have ten years of performance history, the risk level is calculated using the Fund's actual return history and the return history of its benchmark (which is expected to reasonably approximate the Fund's standard deviation) for the remainder of the ten year period.
