2. Partial Year

1. Annualized return. 2. 2014 Return begins at Fund inception. 3. Portfolio Metrics are sourced from CapitalIQ. 4. Portfolio Statistics are calculated on Series M since inception. 5. Benchmark: MSCI World Index Net Total Return CAD (100% Long). The benchmark represents the Fund's investment universe and net long position. The Fund's portfolio manager also has the ability to invest a portion of the assets in cash and cash equivalents and/or high yield debt on a temporary basis when deemed advisable based on market conditions. 6. Risk level is determined using the Fund's ten-year standard deviation. If a Fund does not have ten years of performance history, the risk level is calculated using the Fund's actual return history and the return history of its benchmark (which is expected to reasonably approximate the Fund's standard deviation) for the remainder of the ten year period.
